Upwork Profile

Git Hub

I am a Web & Mobile Developer passionate about building modern, user-friendly applications. Currently in my final year of Computer Science, I specialize in developing fast, responsive, and scalable apps. I have experience in both web and mobile development, ensuring seamless performance and great user experiences. Additionally, during my internship, I explored machine learning and applied it to real-world projects. I enjoy solving problems with code and turning ideas into reality.

Education

COMSATS University Islamabad

2022 – 2026

Degree: Bachelor's in computer science (BCS)

Current CGPA: 3.7

Experience

Machine Learning & Data Science Intern

National Development Complex (June 2024 - August 2024)

- I gained hands-on experience in data science and machine learning using Python, TensorFlow, and Scikit-learn.
- Worked on data preprocessing, training and evaluating ML models for real-world problems.
- Improved model performance through experimentation with various algorithms and tuning techniques.

University Projects

- **Bank Management System** ***(Java, OOP)***
    - Developed modules for account creation, transaction management, and loan approval.
    - Integrated a graphical user interface (GUI) for enhanced user interaction.
- **Online Ticket Booking System** ***(Java, MongoDB)***
    - Designed a movie ticket booking system with MongoDB for backend storage and Java for server-side logic.
    - Ensured smooth ticket flow and seat availability updates in real-time.
- **Travel App** ***(Flutter, Firebase)***
    - Built a travel app with real-time data handling and user authentication using Firebase.
    - Designed a smooth and visually appealing UI for optimal user experience.
- **Chatbot UI Website** ***(React, Bootstrap)***
    - Created a responsive and clean chatbot interface using React.
    - Implemented modular design and styled components for maintainability.

Personal Projects

Frontend Mentor Challenges *(HTML, CSS, JavaScript)*

- Completed multiple real-world frontend challenges to improve UI/UX skills and responsive design techniques. QR-code-component Results-summary-component

Technical Skills

- **Languages:** Python, Java, C/C++
- **Frameworks & Tools:** Flutter, React, Firebase, Bootstrap
- **ML & DS Tools:** Scikit-learn, TensorFlow, Pandas, NumPy
- **Design**: Figma
- **Databases:** MongoDB, Firebase
- **Concepts:** OOP, Web & Mobile Development, Machine Learning, UI/UX Design
