## ABOUT ME

I'm a Web & Mobile Developer passionate about building modern, user-friendly applications. In my final year of Computer Science, I specialize in creating fast, responsive, and scalable apps. I've worked on both web and mobile platforms and explored machine learning during my internship, applying it to real-world projects. I love solving problems with code and bringing ideas to life.

## EDUCATION

COMSATS University Islamabad | 2022-2026

**Bachelor's in computer science (BCS)**

Current CGPA: 3.7

## WORK EXPERIENCE

National Development Complex | June 2024 - August 2024

**Machine Learning & Data Science Intern**

I gained hands-on experience in data science and machine learning using Python, TensorFlow, and Scikit-learn. I worked on data preprocessing, training, and evaluating machine learning models to solve real-world problems. Through experimentation with different algorithms and tuning techniques, I was able to significantly improve model performance.

## PROJECTS

**Bank Management System**

Built in ***Java*** with ***OOP***, featuring account management, transactions, and loan processing with a GUI.

**Online Ticket Booking System**

***Java*** and ***MongoDB***-based system for booking movie tickets with real-time seat updates.

**Travel App**

***Flutter*** app with ***Firebase*** for real-time data and user authentication, offering a smooth UI.

**Chatbot UI Website**

Responsive chatbot interface using ***React*** and ***Bootstrap*** with modular, maintainable design.

**Drivio**

Full-stack web app built with ***MongoDB, Express, React, and Node.js,*** featuring secure user authentication using JWT and role-based access control.

## SKILLS

- Languages: Python, Java, C/C++
- React
- Databases: MongoDB, Firebase
- Flutter
- ML & DS Tools: Scikit-learn, TensorFlow, Pandas, NumPy
